- 77 soft keys add flexibility for day and night menus
- Graphical fueling icons optimize fuel sales control
- On screen customer receipt improves cashier accuracy
- Custom reports and a library of over 60 standard reports provide immediate access to detailed site information
- Purpose-built using industrial grade components for extended life

Value That Pays

VeriFone's new Topaz XL point of sale workstation is an industry first, that features a combination 15 inch touch screen display plus a 120-key keyboard. Topaz XL is built on our industry leading Ruby SuperSystem framework, the best selling POS in the Petroleum and Convenience Retail industry for sixteen consecutive years.

The Topaz XL display features an on screen scrolling receipt, and up to 77 soft keys for the utmost in touch screen menu design flexibility. Display menus and soft key configurations are easily set-up and modified via the Configuration Manager toolkit, accessible in the store or remotely across a secure IP connection. Large sub-menu screens enable cashiers to quickly navigate through daily specials or retrieve time-sensitive food service menus effortlessly. On-screen help menus assist with cashier training and provide quick answers to questions when managers are unavailable for help. An on- screen real time message board provides instant access to vital alerts and other important cashier information.

Topaz XL also features a rich library of reports that are loaded with vital information that enable store managers and site owners to better understand and manage their business. Custom reports are easy to set-up, and augment the library that features over 60 standard reports, including daily sales, identify high volume products, perform loss prevention analysis as well as sales trends by shift and cashier, market basket analysis and many more. An electronic journal is included which allows for easy retrieval of transactions by PLU, date, shift, cashier and department.

Topaz XL provides all of the tools that today's convenience retail operators require including integrated fuel control, tank level sensors, barcode scanners, electronic price signs, car wash controllers, back office applications, integrated loyalty programs, fleet card and financial network services, money order, coin changers, and food service kiosk systems.

FEATURES & BENEFITS

Flexible and Reliable Design

• Developed with advanced infrared technology for the ultimate in touch screen durability
• Tested and certified for the harshest convenience store environments
• Touch screen is designed to be visible in any light and can be easily adjusted to a position that best suits each user
• Robust screen is easily activated with anything from a fingertip to a pencil point — no calibration required

Graphical and Easy to Use Workstation

• Simple interface and customizable control panel allow you to easily tailor screen menus based on your store's unique inventory and sales activity levels
• Fuel sales are processed using animated, graphical fuel icons that manage up to 32 fuel dispensers at one time
• Receipt preview provides clear on-screen viewing and editing of current transactions

Complete Peripheral Connectivity

• Easily connect to virtually any dispenser, all major oil networks and several generic networks
• Complete connectivity to tank monitoring systems, scanners, loyalty programs, car wash controllers, electronic fuel price signs, back office packages and more

Valuable Data Analysis and Reporting Tools

• Provides powerful data analysis, reporting and remote configuration utilities
• Tools enable your entire team to quickly and accurately view and share large amounts of store activity data in order to make fast and sound business decisions
• Remote data access via IP connectivity, a library of standard and custom reports, and enhanced site management utilities
